NLM[®]

, the National Library of

Medicine[®], provides several free web resources, programs, and important initiatives of interest to the public health workforce and the public they serve.

Partners in Information

Access for the Public Health Workforce is a collaboration of U.S. government agencies, public health organizations and health sciences libraries which provides timely, convenient access to selected public health resources on the Internet. Resources on Health Promotion and Health Education, Literature and Guidelines, Health Data Tools and Statistics, Grants and Funding, Education and Training, Legislation, Conferences and Meetings, Finding People, Discussion and E-mail Lists, and Jobs and Careers are included. <http://PHPartners.org>

PubMed[®]

provides access to the research and clinical literature in MEDLINE[®], an index of over 12 million references to biomedical journal articles. <http://pubmed.gov>

MedlinePlus[®]

, has extensive patient education information, in both English and Spanish. Hundreds of health topics include drug information, interactive tutorials, encyclopedia, news, information about support groups, clinical trials, directories, and more. <http://medlineplus.gov>

AIDSinfo

provides current federally approved treatment guidelines for HIV infection and AIDS-related illnesses. HIV/AIDS-related clinical trials, web links, vaccine development, and drugs are also included. <http://aidsinfo.nih.gov> or call 1-800-HIV-0440

Tox Town

provides information that public health workers can use to teach about key topics in toxicology, environmental health and occupational health, such as lead poisoning, air pollution and pesticide dangers. <http://toxstown.nlm.nih.gov>

Household Products

gives safety information for over 4,000 consumer brands of personal care, automotive, garden and cleaning products. <http://householdproducts.nlm.nih.gov>

NCBI

, The National Center for Biotechnology Information, provides tutorials, public databases, and computational resources on how complex interactions among genes and environmental and lifestyle factors can lead to disease.
