About Healthy People 2020 Structured Evidence Queries (SEQs)

This free online resource makes research evidence related to Healthy People 2020 objectives easier to find.

Healthy People 2020 is a set of goals and objectives to guide national health promotion and disease prevention efforts in the United States.

The National Library of Medicine, NIH, and the HHS Office of Disease Prevention and Health Promotion have worked together to develop preformulated search strategies for Healthy People 2020 objectives.

The tool provides one-click search strategies of PubMed, a database of citations and abstracts for biomedical and public health literature from MEDLINE and online books. Citations may include links to full-text content from PubMed Central and publisher websites.

The search queries were developed by public health librarians, working in consultation with subject matter experts in public health. The SEQs are available at www.phpartners.org/hp2020.

Features:

- Quickly find research articles on Healthy People 2020 topics
- Narrow your PubMed search by filters such as age group, gender, or publication date
- Access full-text articles online or order articles through Loansome Doc
- Links to other related resources for public health practice

Getting started is simple:

Choose a Healthy People 2020 objective and click the PubMed button to run the preformulated search

Find Up-to-Date Research on Healthy People 2020 Objectives

EXAMPLE: Find journal literature on reducing the number of new cases of diabetes

A collaboration of U.S. government agencies, public health organizations and health sciences libraries
